## Add+Vantage MR Course 2

---

The Add+VantageMR Course 2 extends teachers' study & application of the Learning Framework in Number to include place value and multiplication and division. Teacher assessment kits include detailed **diagnostic assessments schedules and models to inform instruction** based on an understanding of each child's level of proficiency with computation and number. The Learning Framework in Number provides stages and levels that allow teachers to **pinpoint the child's understanding** and to accelerate children's internalization of advanced number concepts and skills. Participants will examine the Classroom Instructional Framework in Early Number and use this framework to reflect upon curriculum demands. Exemplary instructional settings will be discussed and incorporated into differentiated lessons. Add+Vantage Course 1 is a prerequisite for this 1/2 day course and is open to level 2 and level 3 MITs and to other teachers and paraprofessionals as space allows. Add+Vantage Champions who wish to observe course 2 in fulfillment of the certification requirement are also invited to attend.
